

Disarmament for Sustainable Development

# **Ukraine for Ukrainians**

## **Vienna Manifesto for World Peace.**

### **Speech by the Vice-President of the Plurinational State of Bolivia David Choquehuanca at the International Summit for Peace in Ukraine.**

**Vienna, Austria 10 - 11 June 2023.**

I would like to express my sincere gratitude to the Organizers, Sponsors, Supporters, Civil Society Representatives of the countries of Europe, to the Representatives of Russia and Ukraine who support the objectives of the Peace Summit and to all the beings of the World who share the “Gea” Politics of Living Well and who build Peace on Mother Earth in the changing times of the Tenth Pachakuti.

*Speech by the Vice-President of the Plurinational State of Bolivia David Choquehuanca at the International Summit for Peace in Ukraine  
2023*

- \* According to the “Gea Política de Vivir Bien”, the best war is the one that has never happened. Wars will disappear when the divisive forces replace the logic of division with the logic of complementarity between the differences with which life acts.**
- \* War sabotages the complementary feedback between the different, it destroys life, it is a cult of death.**
- \* In war, behavior is above the law and descends to the law of the strongest.**
- \* War creates a favorable environment for money laundering crimes, human trafficking, nuclear experiments and biological weapons.**
- \* War is a field of testing and analysis of cashless societal behavior.**
- \* In war the owners of the system, money, knowledge and weapons multiply fortunes and socialize poverty, defenselessness and death of the innocent.**
- \* Wars cut the roots of peoples and drive them from their lands.**

Disarmament for Sustainable Development

**\* Let us remember Sun Tzu's thesis from "The Art of War", "The supreme art of war lies in subduing by deception".**

**\* The domination of the human mind by the masters of the system is the main weapon against us, against the culture of life and the culture of Peace.**

**Let us recall Etienne de la Boetie's thesis from the work "The Discourse on Voluntary Servitude", ... "the key to our freedom or subjection lies in consent".**

**\* The owners of the system fabricate consent to wars by using mediocracy, infocracy and telecracy behind the rhetoric of defending universal values.**

**\* Manufacture of consent to wars is the real tyranny exercised over the human mind because it disperses life in complementarity and harmony.**

**D. Choquehuanca,2023.**

Disarmament for Sustainable Development

Indigenous Peoples have never adapted to the world of divisionism, wars and servitude. We resist colonization without ceasing to sing, dance, sow and harvest. We do not stop lighting the fire and connecting with the cosmic-telluric forces that vibrate in the great matrix of life. We observe and follow the dual life-creating matrix in its state of balance, harmony, confrontation and war. **We know that the natural state of complementarity, balance and harmony existing in the** intrapersonal, interpersonal, intra-group, inter-group, community, national and international **spheres can be damaged by a set of measures.**

**We understand as acts of sabotage, terrorism and war those measures that violate the natural state of complementarity, balance and harmony existing between all manifestations of life.**

*Speech by the Vice-President of the Plurinational State of Bolivia David Choquehuanca at the International Summit for Peace in Ukraine  
2023*

## Disarmament for Sustainable Development

From our ancestors we learned that any damage and any violation of complementarity in the dual matrix of life is restored when the contradictions are depolarized and the confrontation disappears. In the Native town where I come from, where we speak the native language of Aymara, there is the word aruskipasipxañanakasakipunirakispawa, which means that through dialogue, contradictions are depolarized and through consensus, confrontation disappears, creating a center of strength that protects everyone. Dialogue and building consensus awaken consciousness, repair the damaged complementarity and restore balance and harmony that protects everyone.

According to our Cosmovision, the present time is the Time of the Tenth Pachakuti, which we understand as the Path of Return to Balance. The Pachakuti is cyclical, it is repeated every 676 years. In the year 1992 the tenth cycle of Pachakuti began, **which came to teach and oblige us to learn behaviors that repair the complementarity and balance between the polarized, the opposite, the different.**

We, the Original Peoples, have never departed from the logic with which life operates, we inherited it from our ancestors, and we call it Trialectics. For the

2023

Disarmament for Sustainable Development

Andean-Amazonian cultures, **visible life is equal, it is dual and complementary and is sustained by two forces**; the cosmic force and the telluric force, mother-father, chacha-warmi, which sustain all manifestations of life. These two forces regulate themselves according to the trialectic logic of complementarity, balance and harmony. In other cultures, the Time of the Tenth Pachakuti is called the Time of Apocalypse, the Time of Revelation of Truth or the Time of the Civilizational Crisis in the West.

**The message of the present time calls humanity to transcend the anthropocentric, egocentric and divisive approach to depolarize life in all its manifestations, to learn to redress the balance between polarities, to increase the vibration and strength for the Living Well of all.**

In the world where lies dominate, the truth and the joy of being cannot be found. Humanity has been denied to live in the truth of complementarity, balance and harmony and through deception has been forced to live in divisionism, confrontation, suffering and wars.

In the world of lies, the contributions that people give through taxes are used to produce wars, plunder and collective crimes.

*Speech by the Vice-President of the Plurinational State of Bolivia David Choquehuanca at the International Summit for Peace in Ukraine*

2023

## Disarmament for Sustainable Development

The war unleashed between Ukraine and Russia in February 2022 must end, it is a very serious crime and must be judged and condemned by law, justice and the international community.

The truth must be revealed about the interests of the visible and invisible actors involved in this war that has taken innocent lives.

**For 471 days, consent for the victims, smokescreens for the beneficiaries and tolerance for crime are being fabricated in the public opinion.** The NATO spokesman's statement that "we must fight to the last Ukrainian" means the same as the Indians of our continent were told that "the only good Indian is the dead Indian". The more terror and crime, the more politicians on both sides are interested in arming Ukraine and Russia and the more tax money is diverted to the arms market. It is well known that feet and hands must first be cut off in order to sell more expensive prostheses.

Wolodymyr Zelensky's statements in response to the Vatican's peace initiatives are striking, quoting ANSA (...) "the point is that we do not need mediators to achieve peace with Russia". (...) "the peace plan should only be Ukrainian" (...) Zelensky dismisses

## Disarmament for Sustainable Development

peace initiatives and advocates a "counter-offensive". The Kremlin claims that the Ukrainian leader's statements on a peace agreement were made without taking reality into account.

Russia's permanent representative to the UN Vasili Nebenzia said that the Ukrainian president's peace initiatives were (...) "a mockery of the notion of a peace plan". (...) stressing that "all of Moscow's demands on the peace plan are well known".

The public opinion is deeply struck by the leading, pro-Russian role of the Wagner Mercenary Group in this conflict and the statements of its leader Yevgeny Prigozhin while the G-7 Summit was taking place in Hiroshima on May 19-20, 2023. Quoting the RTVE Agency (...) "Prigozhin, head of the Wagner Group mercenaries, claims that they have seized the city of Bakhmut in eastern Ukraine on the anniversary of the fall of Mariupol. **They intend to transfer control of Bakhmut to Russian regular forces by May 25, 2023,** which the Kremlin government has not confirmed and the Kiev government has denied. "(...) For the rebellious public opinion opposing the wars the Social Engineering experts of the powers involved fabricate counter-information and counter-manipulation to

Disarmament for Sustainable Development

implement measures that in normal conditions the opponents would not have approved.

In addition, it is necessary to remember the great inflationary significance of the Russian-Ukrainian war that maintains the Covid- inflation of the year 2020-2021 through the war- inflation of the year 2022-2023.

**Since February 2022, the official Western narrative has been pushing the polarization of the conflict, speaking well of Ukraine, speaking ill of Russia and excluding the narrative with a depolarizing approach to the conflicting forces. No to the death of Ukrainians and Russians! Ukraine belongs to Ukrainians! Hands off the powers of Ukraine!**

Ukrainians and Russians are a miracle of life and not the offerings to the Cult of Death. However, for this moment they are not a miracle of life.

We have to leave the position of victims and beneficiaries and solve the problems to be solved for the sake of the Living Well of humanity and Mother Earth.

The tenth Pachakuti "puts in checkmate" the monopoly on truth. With the monopoly on truth, only

*Speech by the Vice-President of the Plurinational State of Bolivia David Choquehuanca at the International Summit for Peace in Ukraine 2023*

## Disarmament for Sustainable Development

the totalitarianism of infocracy and tyranny over the human mind has been achieved in order to fabricate consent to the crime of war and the smokescreen for the beneficiaries.

The moment each individual and each collectivity develops its self-power and puts its capacities and talents to work, the monopoly on truth and tele-tyranny will come to an end.

Etienne de la Boetie in his work "Discourse on voluntary servitude" warns us that "The key to our freedom or subjection lies in consent". The masters of the system, of money and of wars know this. They never cease to manufacture the consent of their victims because then their power ends.

\*Hard times make strong people.

\*Strong people create strong consciousness.

\*Consciousness is the attribute of human essence.

\*Conscience is transcending tensions and restoring balance because peace does not stand on tensions.

\*We do not need politicians who polarize and repolarize conflicting forces.

\*We need realistic and logical politicians capable of depolarizing conflicting forces.

\*We do not need mediocracy and infocracy that

Disarmament for Sustainable Development

unleash terror and panic among the people, who, being frightened, accept measures that place some above the law and others below the law of the strongest.

### **Ignorance leads to suffering, consciousness makes us strong.**

The Dictionary of the Royal Spanish Academy of Language points out that the word **consciousness** is based on three pillars; the knowledge of oneself, the knowledge of the reality that surrounds us and the feedback that exists in the complementarity between knowing what is inside and what is outside. For us it is to awaken the Qhawana which means to look beyond what our eyes see. Consciousness demands to know reality and not to be trapped by reality. Being trapped by reality from within and from without produces division, confrontation, exclusion, subjugation and conspiratorial attitudes, while knowing the inner and outer reality leads to understanding and transcending the forces that violate complementary feedback.

Unfortunately, the narrative of the operators of the geopolitics of domination never talks about knowing

Disarmament for Sustainable Development

oneself and knowing one's surroundings in complementary feedback to transcend conflicts and create balance and harmony.

In the words of the official narrative of the geopolitics of domination there is no progress for a new humanity, no return of cycles, no direction to transcend anything, only division, attacks, exclusion, contempt, judgement and blame. In the time of change and the revelation of truth it is not about division, judgement, exclusion and subjugation anymore, it is about transcending all division.

Behind the rhetoric of the defense of universal values the narrative of the geopolitics of domination seeks to confuse, disperse and obstruct the expansion of consciousness.

This **is the time** of freedom to be conscious.

This is **not the time** of freedom from egocentrism and anthropocentrism that divides and pits the politically correct against the conspiratorial.

**Consciousness does not divide, it does not impose.**

**Conscience leads to transcend what is divided.**

The politicians of the geopolitics of domination were always directed against humanity and against Mother Earth. They have managed to play us all against each

*Speech by the Vice-President of the Plurinational State of Bolivia David Choquehuanca at the International Summit for Peace in Ukraine*

2023

## Disarmament for Sustainable Development

other so that we do not detect who it is that is confronting us.

Those who have set up the system of the geopolitics of domination have the money, the military power, the power of religions and the results of all crises in their favor, especially the results of the health crisis of 2020.

In February 2022, they decided to fabricate one more crisis, plunder the Ukrainian territory and sacrifice lives in order to officially seal the birth of the "New World".

In the geopolitics of domination, history repeats itself. The birth of the new always manifests itself through genocide, plunder and sacrifice of all manifestations of life. During the time of the Ninth Pachakuti the indigenous People of our continent were assaulted and subjected to **five centuries of unpunished wars**, crimes of our heroes and heroines, genocide of the innocent, plundering of our riches, appropriation of our territories to exterminate us, wipe us off the map and eliminate us from planet earth.

Today's public opinion of politically correct conformists and rebellious opponents is being gripped by **divisive** skepticism where "nothing is true and

Disarmament for Sustainable Development

nothing is a lie and everything depends on the lens through which you look at it". **They talk good about Ukraine, they talk bad about Russia or they don't talk at all, because the narrative of transcending conflict is not part of war strategy.**

The Indigenous People who preach and practice the Way of Living Well are building a new narrative that prioritizes the virtuousness of the human being, the role of the community and adherence to the laws of Mother Earth.

**Our ancestors used to say "if the path is not one of consciousness, there is no path"**. That is why in turbulent times there is no war, but consciousness understood as the way back to equilibrium.

For all these reasons I want to say that the fight is for us, for them and against no one.

**Shout out to the brotherhood of the world!**
